k. **Description of Request:** The licensee proposes to formally designate the project's current operations as run-of-river operations through revising Article 37 of the license. The licensee explains that the request is in support of renewable energy initiatives applicable to the project only if it is designated as operating in a run-of-river mode. Given the operational limits of the project's existing license, which equates to no useable storage capacity within the project's impoundment, the licensee currently operates the project in a run-of-river mode. The licensee is not proposing any changes to project facilities, existing operations, or the existing project boundary.

l. **Locations of the Application:** This filing may be viewed on the Commission's website at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. n. **Comments, Protests, or Motions to Intervene:** Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.
